Silver defroster tab bonding repair

Frost Fighter® Defroster Tab Bonding Repair

Repair separated or broken rear window defroster tabs

This best seller conductively bonds defroster tabs to rear defrosters. The 2000 Frost Fighter Tab Bonding Kit's highly conductive two-part silver adhesive bonds aggressively forming the electrical and structural connection in one simple operation.

Defroster Tab Bonding

Designed for reliable defroster tab bonding this kit's adhesive contains over 80% silver for maximum electrical properties needed for high amperage defroster tab repair.

Each kit comes with complete instructions, sandpaper, stir sticks, mixing pads and enough material for up to five repairs from a single kit. Fully illustrated instructions make repairs easy.

Frost Fighter Tab Bonding adhesive can repair even extensive defroster damage that occurs when the tab pulls a large area of the defroster away from the glass. Just apply the conductive adhesive over the damaged defroster and place the tab.

Separated Defroster Tab

Heat cure for best results in less than thirty minutes for best results using a hair dryer, heat gun or shop light.

Located on each side of defroster the critical defroster tabs connect the defroster grid with the vehicle's high amperage defroster circuit.

These all important tabs can be knocked off of the defroster causing total defroster failure. Look for dangling wires near the sides of the defroster.

This system to be easy to use, bonds aggressively and makes the highly conductive bonds needed for defroster tab repair.
