System Networking*

ThermaSync® Defroster Control Systems

For use with ClearView II Defrosters. Available in 12 or 24 volts, automatic or adjustable timers shutoff and variable modulation settings

ThermaSync® Defroster Controls

Frost Fighter ThermaSync® defroster controls are the perfect companion for ClearView II and other defrosters.

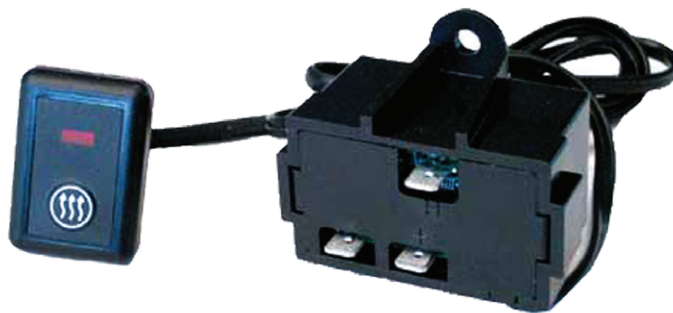

Available in four models from the simple automatic ten minute timing to more sophisticated adjustable automatic shut off timing, power modulation and network control allowing a single switch to control multiple defrosters.

The 2800 M series of defroster controls feature adjustable automatic shut off timing, power modulation and can be connected in a network to control multiple defrosters with a single switch.

All controls and defrosters are available in 12 and 24 volts.

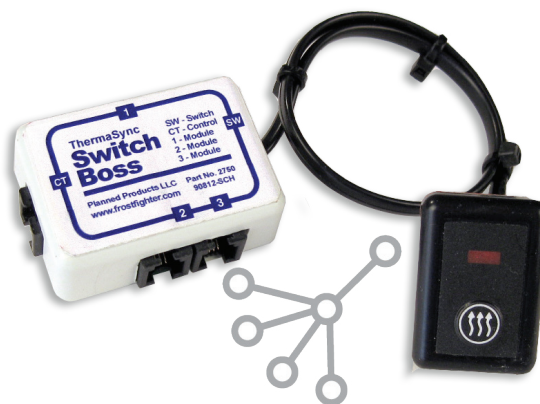

2700 R Series in 12 or 24 Volt
• 10 Minute Timing & 100% Modulation

2800 M Series in 12 or 24 Volt
• Variable Timing and Modulation Capability

Switch Boss Defroster Control

This control enables several ClearView II defrosters to be activated from a single master switch. Each defroster's ThermaSync® control is plugged into the Switch Boss. Up to four defrosters per Switch Boss can be used. The networked defrosters can be different sizes. Automatic timing is set by the Master.

ThermaSync® Switch Boss activates several defrosters from a single switch.

Special Applications

In addition to standard defrosters we have defrosters for the wiper arm horizontal rest and vertical push areas on large truck windows and for pickup truck, transit vans and camper shell rear windows, and many other custom applications.
