

## **DEFROSTERS FOR PICKUP TRUCK REAR WINDOWS**

**Easy to install rear window defrosters for safe winter driving**

Rear window defrosters can be handy on those cold winter mornings or when the going gets tough in bad road conditions. Only about half of new trucks come with a rear defogger.

**Clear View rear window defroster kits** are easy to install on *Ford, Chevrolet, Toyota, and Dodge pickups and most other makes and models that don't come with a rear defrost.* They provide factory defroster performance with an attractive finished look.

Clear View Defrosters reliably melt snow and ice even in the coldest winter conditions. The defroster elements come on pre spaced rolls for perfect alignment and are trimmed to the window size for a custom fit. The heating elements bond aggressively to the glass and are similar in color to factory elements.

The defroster is connected electrically to power and ground through the Clear View side buss bars. The defrosters have an electrical resistance which when powered results in heating performance similar to factory rear defrost.

Clear View defrosters come as complete ready to install units including the ThermaSync defroster timer control and an activation switch with defroster symbol and indicator light. The defroster switch can be mounted remotely from the control in the dash or using the under dash mount included with the unit.

A full wire harness with the color coded connectors and installation pack with fuse make it easy to install

*Layout of the Clear View II 1209-4567-PIC Truck Defroster*

**Not for use on segmented or sliding back windows. If your truck has sliding or three panel windows Clear View defrosters will not work.**

All Clear View defrosters come with a set of general instructions and attachment detailing the exact defroster being installed. Fully illustrated easy step-by-step layout helps speed installation.

### **Stick Kits now available**

When the factory wiring is installed but a defroster is not on the back glass then the Clear View II Stick Kit defroster is the solution. Stick Kits include everything that sticks to the glass including the heating elements and side buss bars for connection to existing defroster wiring.

## **TRUCK CAP REAR WINDOW DEFROSTERS**

### **Easy to install rear window defrosters for safe winter driving**

Rear window defrosters can be handy on cold winter mornings or when the going gets tough in bad road conditions. **Clear View Pickup Cap Defrosters** provide factory defroster performance with an attractive finished look. Because caps have glass that is relatively easy to access, installing the Clear View defroster is simple.

The truck cap defrosters are available in two sizes to fit nearly any size back glass including **Leer, Snug Top, Ranch, ARE, ATC, Unicover, Century, and most others!**

Clear View Defrosters reliably melt snow and ice even in the coldest winter conditions. The defroster elements come on pre spaced rolls for perfect alignment and trimmed to the window size for a custom fit. The heating elements bond aggressively to the glass and are similar in color to factory elements.

The defroster is connected electrically to power and ground through the Clear View side buss bars. The defrosters have an electrical resistance which when powered results in heating performance similar to factory rear defrost.

Clear View defrosters come as complete ready to install units including the ThermaSync defroster timer control and activation switch with defroster symbol and indicator light. The defroster switch can be mounted remotely from the control in the dash or using the under dash mount included with the unit.

A full wire harness with the color coded connectors and installation pack with fuse make it easy to install.

## Defroster controls with smarts

Clear View defrosters use 2812 ThermaSync controls which provide several options including operation of multiple defrosters with a single switch plus a range of automatic timing options from ten minutes to continuous operation.

## Connections

Defrosters only require two electrical connections (positive and ground) which are made using the tabs integral to the defrosters side buss bars. The defroster control is easy to connect using the supplied wire harness.

## Installation, everything is included

Delivered ready to install, Clear View Defrosters include the ThermaSync control, defroster switch and installation pack including wiring harness, under dash mount, fuse, fuse holder, mounting screws, connectors and other installation accessories.

## Instructions

All Clear View defrosters come with a set of general instructions and attachment detailing the exact defroster being installed. Fully illustrated easy step-by-step layout helps speed installation.

## Stick Kits Now Available

When the factory wiring is installed but a defroster is not on the back glass then the Clear View Stick Kit defroster is the solution. Stick Kits include everything that sticks to the glass including the heating elements and side buss bars for connection to existing defroster wiring.
